

G-Connector

Transform how you manage and automate your Salesforce data in Google Sheets

Access a complete data management toolbox that, combined with the power of Google Sheets, will take your productivity to new heights.

What is G-Connector for Salesforce?

G-Connector is an app that seamlessly connects Salesforce to Google Sheets in a two-way live data exchange. It schedules and automatically refreshes your Salesforce reports even when you're offline and sends team notifications. Its deep integration to Salesforce allows you to transform and efficiently manage your data in a familiar Google Sheets environment.

The only CRM data management tool you need in your toolkit. One Tool, multiple uses

Data loading

Perform unlimited exports and imports in bulk directly from Google Sheets. Pull your data from Salesforce reports or via dynamic SOQL. No more manual work and csv hassle!

Automation

Schedule automatic data imports, exports and snapshot reports in Google Sheets for intervals up to 1 hour.

Reporting and data analysis

Create and share custom reports in Google Sheets with all the great tools spreadsheets have to offer. Pull your Salesforce data with precision, then slice and dice your data at will!

Mutple accounts support

If you have several logins, G-Connector keeps them for you so switching between accounts is easy. There's no limit as to how many Salesforce.com orgs you can connect to.

Data cleansing

Keep the quality of your data with seamless manipulation: mass update, upsert, insert, delete, undelete and merge your records.

Google Drive integration

Import/export and share Salesforce files and data in your team's shared Google Drive.

Google forms integration

Sync your Google Forms data to Salesforce in a Live Data exchange. Save your survey data in Salesforce.

Team notifications

Schedule notifications to team members and management after a data refresh has been completed.

Drive more performance, innovation and cost-efficiency.
The annual price is paid off in the **first work hour of use.**

Key benefits of using G-Connector

Salesforce reporting tool: Create dynamic dashboards in Google Sheets that automatically pull data from Salesforce.

Increase team collaboration: Have your team work on a single workbook. Give visibility to Salesforce data as well as a way to upload and modify Salesforce data and files to team members who don't have an expensive Salesforce license.

Salesforce automation: Schedule your highly customizable data imports and exports. Send automatic team notifications. Automatically save historical data in snapshots.

Perform Salesforce data manipulation and analytics in Google Sheets.

Intuitive user interface and friendly UL.

Outstanding and fast support. Ask us anything...we got you!

What our customers say about G-Connector

Best connector for Salesforce I've used

I have worked with a lot of Salesforce & Google Sheets connectors over the last 10 years , and G-Connector has always been my go to application. It saves me a ton of time by not having to export reports and keep updating via new exports or creating queries.

Tami Miller

If you're not using G-Connector, you should be

I can confidently say that it is nothing short of exceptional. If you're someone who works extensively with Salesforce data and is looking for a tool to automate syncing with Google Sheets, this is an absolute must-have. G-Connector has transformed the way I handle large volumes of data, making it an indispensable part of my toolkit.

Alon Rozin

Saves loads of time!

This tool has genuinely made my job and the job of my team vastly more efficient. It's ease of use and Automatic Operations have made connecting Salesforce data to google sheets and more a fully automated, worry free operation that saves loads of time.

Will Ritchings

The best value tool I use

I rely heavily on this tool to summarize financial data and business KPI's in google sheets, so that metrics can more easily be shared than an SF dashboard. I'm not one to pay for premium software if I don't have to, and this is perhaps the best value tool I use.

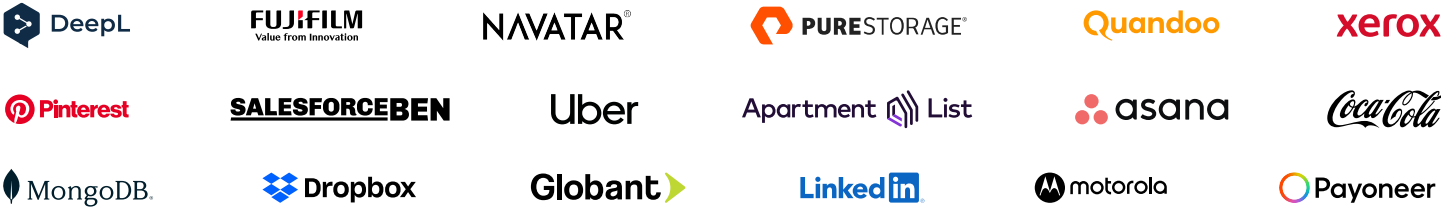

Jeremy Bardet
